Amendment

of said lubricant.

15. (Amended) A lubricious coating for use on a medical device, said coating comprising a mixture of at least one hydrophobic lubricant, at least one hydrophilic fluorescent dye and at least one surfactant, said coating fluorescing upon exposure to an energy source capable of inducing fluorescence.

31. (Amended) A medical device comprising a single coating, said coating comprising a mixture of:

- a) at least one lubricious compound; and
- b) at least one fluorescing agent.

32. (Amended) The medical device of Claim 31 further comprising at least one surfactant.

33. (Amended) The medical device of Claim 32 wherein said lubricious compound is hydrophobic and said fluorescing agent is hydrophilic.

34. (Amended) The medical device of Claim 31 wherein said lubricious compound is silicone based.

35. (Amended) The medical device of Claim 31 wherein said lubricious compound is polydimethylsiloxane.

36. (Amended) The medical device of Claim 31 wherein said at least one fluorescing agent is a fluorescein, rhodamine, triarylmethane, derivative thereof or mixture thereof.

37. (Amended) The medical device of Claim 36 wherein said at least one fluorescing agent is 5-carboxyfluorescein, 6-carboxyfluorescein, indocyanine green, lissamine green, rose bengal, or mixture thereof.
